

Sedona Fiber Cement Coffee Table

615.00 €

Meet the Sedona: a sculptural coffee table built for open-air living. A fusion of glass fiber, sand, and cement creates a feather-light top that shrugs off rain, sun, and spills. Each piece is hand-pigmented, sealed, and finished with a scratch-guard topcoat, so the surface only gets better with age—natural variations and hairline marks add story, not flaws. Pair with tailored Sur Last® covers for year-round protection (ask our design team).
